

Exiequielle John Frias (XC)

Full Stack Developer

Manila, Philippines | frias.exiequiellejohn@gmail.com | [linkedin.com/in/exiequielle-john](https://www.linkedin.com/in/exiequielle-john) | github.com/jagwaw

SUMMARY

Full Stack Developer with 8+ years of experience shipping fintech and product systems across Vue/Nuxt frontends, Django REST APIs, realtime services, async workers, and deployment pipelines. Comfortable owning features from polished UI through backend integration, CI/CD, and production serving.

TECHNICAL SKILLS

Frontend: Vue.js, Nuxt.js 2 & 3, TypeScript, JavaScript, Tailwind CSS, SASS/SCSS, Vuex/Pinia, GSAP, PWA, WebSocket, responsive UI

Tools & AI: Git, Figma, Cursor, Claude, ChatGPT, Postman, JIRA, Confluence, Bitbucket, ClickUp

Backend: Python 3.9, Django 4.1, Django REST Framework 3.14, FastAPI, Django Channels, Daphne, Gunicorn, Celery, RabbitMQ, Kafka, REST APIs

Databases: PostgreSQL, Redis, MySQL, MongoDB

CI/CD & Deployment: GitLab CI, semantic-release, Ansible deployment scripts, systemd services, Docker, Docker Compose, Docker registry images, Nginx, AWS EC2/RDS/S3-style targets

PROFESSIONAL EXPERIENCE

Billlease - Full Stack Developer

Feb 2024 - Present

- Implemented redesigned flows for Account Recovery v2 and sign-up registration
- Built product features across Vue/Nuxt frontends and Django REST API integrations
- Worked with Django Channels, Daphne, Redis, Celery, RabbitMQ, and Kafka-backed services
- Supported GitLab CI, semantic-release, Docker registry images, and Ansible/systemd deployment scripts
- Integrated liveness detection using in-house Innovatrics SDK and backend verification flows
- Built Chat Notification UI, Bills Upload AI UI, Pay Now Installments UI, FOMO, and Mobile Load Promo features

Penbrothers (Client: Gamesys / Bally's) - Frontend Developer

Oct 2021 - Jan 2024

- Maintained and improved client-facing websites for a global gaming company
- Designed and implemented mobile-first features for better user experience
- Collaborated with European and American stakeholders on requirements, reviews, and frontend delivery

Narrasoft (Client: Panoply.io) - Python Developer

May 2021 - Oct 2021

- Worked on a cloud-based data warehouse platform for an Asia-based client team
- Created and modified data source integrations from multiple providers
- Collaborated with Asian stakeholders on requirements, delivery, and technical decisions
- Wrote clean, testable, PEP-compliant Python code for features and bug fixes

Remote Staff - Junior Full-Stack Developer

Jul 2018 - May 2021

- Collaborated with Australian clients on requirements and delivery for remote product work
- Built a remote classroom platform tracking real-time user activity
- Developed project and task management systems for clients, staff, teachers, and students
- Delivered AngularJS + Python (Falcon/FastAPI) apps; containerized APIs with Docker for deployment

EDUCATION

Bachelor of Science in Information Technology

Lyceum of the Philippines University - Manila | 2014 - 2018
